

Mirrool Creek Landcare Soil Moisture Probe Install

What: The landcare group has received funding through Murrumbidgee CMA to install 3 moisture probes and a transmitter on two properties to monitor soil moisture and response under different management conditions.

Date: Wed. 27th March 2013

Start: "Felix Farm" (4km south on Rogers Rd) Ariaiah Park - Matt Dart's at 8am, then onto Mick Denyer's. Approx 2hrs per location for installation.

Details: Cropsol (Paul Hudson) www.cropsol.co.au and FarmLink (Paul Breust) www.farmlink.com.au will be doing the probes installing, Lex Wiencke the trenching and AL Chalmers (Bernie) will be soil testing.

Come and have a look at how the probes are installed, welcome to just call in at either property. New landcare members welcome (\$10/family payable to Evan Speirs).

If it's wet we may have to change the date. We'll send out a text via resellers or give Matt or Robyn a call.
