

## **PROFIT = Working With not against Nature**

**The Mulloon Institute is bringing Tarwyn Park Training to the Upper Shoalhaven in March 2017!**

*“Never enjoyed a course as much or was impacted so profoundly. Can't rate it highly enough.”*

Participant quote

At the first Mulloon Institute hosted Natural Sequence course in November 2016, participants gained unique landscape regeneration insights they could immediately go away and trial on their own properties.

This coming March, Stuart and Peter Andrews will once again lead a 'hands on' four day workshop in how to redesign your farm to maximise productivity and landscape function, while minimising costs.

You will learn how to:

- Read the landscape
- Gain maximum benefit from your property's natural resources (water, soil, plants, animals, sunlight and gravity)
- Locate, design and build landscape structures such as leaky weirs and mulch contours
- **Lower your costs and increase your profits**
- Redesign your own property and
- build confidence to begin making landscape function improvements on your farm.

**When:** March 19<sup>th</sup> - 23<sup>rd</sup> 2017

**Where:** 'Duralla' Mulloon Creek.

**Accommodation and meals:** Tombarra – Mongarlowe.

**Total cost:** \$2,000+GST. Includes accommodation, meals, transport to field site, and course materials.

*Don't miss this opportunity to gain practical experience in triple-bottom-line landscape reconstruction.*

**For further information and bookings, contact:** Peter Hazell at The Mulloon Institute.
